Visitor Services Project Report 113

March 2000

Margaret Littlejohn is VSP Coordinator, National Park Service, based at the Cooperative Park Studies Unit, University of Idaho. I thank Chris Hoffman, Mike Meehan and the staff and volunteers of New Bedford Whaling National Historical Park for their assistance with this study. The VSP acknowledges the Public Opinion Lab of the Social and Economic Sciences Research Center, Washington State University, for its technical assistance.

Visitor Services Project New Bedford Whaling National Historical Park Report Summary

- This report describes the results of a visitor study at New Bedford Whaling National Historical Park (NHP) during July 20-26, 1999. A total of 420 questionnaires were distributed to visitors. Visitors returned 284 questionnaires for a 68% response rate.
- This report profiles New Bedford Whaling NHP visitors. A separate appendix contains visitors' comments about their visit. This report and the appendix include summaries of those comments.
- Over one-half (62%) of the visitor groups were family groups. Thirty-seven percent of visitor groups were groups of two; 50% were in groups of 3 or more. Thirty-five percent were aged 41-55; 22% were 15 years of age or younger. Over one-half of the visitors (54%) were female and 46% were male. Thirty percent of visitors had graduate or professional degrees and 34% had a college degree. For 95% of the visitors, English was their primary language.
- United States visitors were from Massachusetts (43%), Florida (6%), and 34 other states, plus Washington D.C. Seven percent of the visitors were from an international origin including Canada (43%), Germany (27%), Switzerland (14%), and 6 other countries.
- Seventy-five percent of visitors were making their first visit to New Bedford Whaling NHP. Most of the visitor groups (90%) spent less than a day in New Bedford. Sixty-four percent of the visitors spent between 2 and 4 hours in town.
- Prior to their visit, over one-half of the visitor groups (57%) were aware that the park existed. Forty-one percent of the visitors said New Bedford Whaling NHP was their "primary destination" and 42% said it was "one of several destinations." The most common sources of information used to plan their visit to New Bedford Whaling NHP were friends or relatives (28%) and previous visits (20%).
- On this visit, the most common reasons for visiting were to visit the New Bedford Whaling Museum (58%), learn about whaling and maritime history (29%), and visit New Bedford Whaling NHP (25%). The least common reason for visiting was to research family history (3%).
- On this visit, the most commonly visited sites in New Bedford Whaling NHP were the New Bedford Whaling Museum (79%), park visitor center (52%) and Seaman's Bethel (50%). The least visited site was the Rotch-Jones-Duff House (11%). The sites most often visited first were the park visitor center (41%) and the New Bedford Whaling Museum (36%).
- With regard to the use, importance and quality of services and facilities, it is important to note the number of visitor groups that responded to each question. The services and facilities most used by 240 visitor groups were the New Bedford Whaling Museum (76%), NPS Visitor Center (57%), assistance from park staff (31%) and the Waterfront Visitor Center (25%). The most important services and facilities were the New Bedford Whaling Museum (86% of 158 respondents) and the NPS brochure (78% of 40 respondents). The highest quality services and facilities were NPS staff assistance (94% of 67 respondents), NPS brochure (87% of 38 respondents), New Bedford Whaling Museum (86% of 156 respondents) and NPS Visitor Center (86% of 121 respondents).
- The New Bedford area services and facilities most used by 236 visitor groups were restrooms (61%), street parking (55%) and restaurants (48%). According to visitors, the most important services and facilities were restrooms (92% of 138 respondents), street parking (86% of 120 respondents), and garage/lot parking (85% of 69 respondents). The highest quality services and facilities were garage/lot parking (84% of 68 respondents), street parking (81% of 116 respondents) and benches (80% of 51 respondents).
- Ninety-one percent of visitor groups rated the overall quality of visitor services at New Bedford Whaling NHP as "very good" or "good." Visitors made many additional comments.

INTRODUCTION

This report describes the results of a study of visitors at New Bedford Whaling National Historical Park (NHP). This visitor study was conducted July 20-26, 1999 by the National Park Service (NPS) Visitor Services Project (VSP), part of the Cooperative Park Studies Unit at the University of Idaho.

The **Methods** section discusses the procedures and limitations of the study. The **Results** section includes a summary of visitor comments. An **Additional Analysis** page is included which will help managers request additional analyses. The final section includes a copy of the **Questionnaire**. An appendix includes comment summaries and visitors' unedited comments.

Most of this report's graphs resemble the example below. The large numbers refer to explanations following the graph.

① **Figure 4: Number of visits**

- 1: The figure title describes the graph's information.
- 2: Listed above the graph, the 'N' shows the number of visitors responding and a description of the chart's information. Interpret data with an 'N' of less than 30 with **CAUTION!** as the results may be unreliable.
- 3: Vertical information describes categories.
- 4: Horizontal information shows the number or proportions in each category.
- 5: In most graphs, percentages provide additional information.

METHODS

Questionnaire design and administration

The questionnaire for this visitor study was designed using a standard format that has been developed in previous Visitor Services Project studies. A copy of the questionnaire is included at the end of this report.

Interviews were conducted with, and questionnaires distributed to, a sample of visitors who arrived at New Bedford Whaling NHP during July 20-26, 1999. Visitors were sampled at a total of four locations (see Table 1).

Table 1: Questionnaire distribution locations

Location:	Questionnaires distributed	
	Number	%
Whaling Museum	212	50
NPS Visitor Center	130	31
Waterfront Visitor Center	55	13
Rotch-Jones-Duff House	23	6
GRAND TOTAL	420	100

Visitor groups were greeted, briefly introduced to the purpose of the study, and asked to participate. If visitors agreed, an interview lasting approximately two minutes was used to determine group size, group type, and the age of the adult who would complete the questionnaire. This individual was then given a questionnaire and asked his or her name, address, and telephone number in order to mail them a reminder/thank you postcard. Visitor groups were asked to complete the questionnaire during or after their visit, then return it by mail in a postage-prepaid return envelope.

Two weeks following the survey, a reminder/thank you postcard was mailed to all participants. Replacement questionnaires were mailed to participants who had not returned their questionnaires four weeks after the initial interview. Eight weeks after the survey a second replacement questionnaire was mailed to visitors who still had not returned their questionnaires.

Returned questionnaires were coded and the information entered into a computer using a standard statistical software package. Frequency distributions and cross-tabulations were calculated for the coded data, and responses to open-ended questions were categorized and summarized.

Data analysis

This study collected information on both visitor groups and individual group members. Thus, the sample size ('N'), varies from figure to figure. For example, while Figure 1 shows information for 275 visitor groups, Figure 5 presents data for 807 individuals. A note above each graph specifies the information illustrated.

Sample size, missing data and reporting errors

Occasionally, a respondent may not have answered all of the questions, or may have answered some incorrectly. Unanswered questions result in missing data and cause the number in the sample to vary from figure to figure. For example, while 284 visitors to New Bedford Whaling NHP returned questionnaires, Figure 1 shows data for only 275 respondents.

Questions answered incorrectly due to carelessness, misunderstanding directions, and so forth turn up in the data as reporting errors. These create small data inconsistencies.

Like all surveys, this study has limitations, which should be considered when interpreting the results.

Limitations

1. It is not possible to know whether visitor responses reflect actual behavior. This disadvantage applies to all such studies and is reduced by having visitors fill out the questionnaire soon after they visited the park.

2. The data reflect visitor use patterns of visitors to the selected sites during the study period of July 20-26, 1999. The results do not necessarily apply to visitors during other times of the year.

3. Caution is advised when interpreting any data with a sample size of less than 30, as the results may be unreliable. Whenever the sample size is less than 30, the word "**CAUTION!**" is included in the graph, figure or table.

**Special
Conditions**

During the study week, weather conditions were fairly typical of July with warm, humid days.

RESULTS

At New Bedford Whaling National Historical Park, 454 visitor groups were contacted, and 420 of these groups (93%) agreed to participate in the survey. Questionnaires were completed and returned by 284 visitor groups, resulting in a 67.6% response rate for this study.

Table 2 compares age and group size information collected from both the total sample of visitors contacted and those who actually returned questionnaires. Based on the variables of respondent age and visitor group size, non-response bias was judged to be insignificant.

Visitors contacted

Table 2: Comparison of total sample and actual respondents

Variable	Total sample		Actual respondents	
	N	Avg.	N	Avg.
Age of respondents	407	47.4	275	48.9
Group size	384	3.2	275	3.2

Figure 1 shows visitor group sizes, which ranged from one person to 29 people. Thirty-seven percent of visitor groups consisted of two people, while another 19% were people visiting in groups of four.

Sixty-two percent of visitor groups were made up of family members, 12% consisted of only friends, 9% were made up of family and friends, and 14% of visitors were alone (see Figure 2). Groups listing themselves as "other" for group type included tour groups and school groups.

Figure 3 shows whether or not visitors were with a tour or education group. Ninety-three percent of the respondents were not with a tour or education group, while 7% of the visitors answered yes. Figure 4 shows the tour/education group size, but this data must be viewed with caution due to the small number of respondents.

Figure 5 illustrates that 54% of visitors were female while 46% were male. Forty-three percent of visitors were ages 36-55 (see Figure 6). Visitors aged up to 15 years comprised 22% of the visitation to New Bedford Whaling NHP.

Demographics

**Demographics-
continued**

Seventy-five percent of visitors were visiting New Bedford Whaling NHP for the first time, while 18% of visitors had visited New Bedford Whaling NHP between two and four times (see Figure 7).

Over three-fourths of the visitors (79%) had a college degree of some type, as shown in Figure 8. Over one-third of the visitors (34%) had college degrees, and 30% had graduate or professional degrees. Eighteen percent were high school graduates or had a GED.

Ninety-five percent of visitors listed English as their primary language (see Figure 9). Other primary languages included German, French, and Chinese (see Table 3), although this data should be reviewed with caution.

International visitors comprised 7% of New Bedford Whaling NHP visitors. The largest proportion of international visitors were from Canada (43%), Germany (27%), and Switzerland (14%), as shown in Table 4. The largest proportion of U.S. visitors were from Massachusetts (43%) and Florida (6%). Smaller proportions came from 34 other states and Washington D.C. (see Map 1 and Table 5).

Visitor groups were asked how much time they planned to spend in New Bedford. Ninety-four percent of visitor groups planned to spend two days or less in the town (see Figure 10). Of the groups that planned to spend less than a day, 73% of the respondents planned to spend four hours or less (see Figure 11).

Length of visit in New Bedford

When asked how much time visitors actually spent in New Bedford, 94% of the visitors actually spent two days or less (see Figure 12). Figure 13 shows that 71% of visitors spent four hours or less in New Bedford.

Figure 10: Number of days visitors planned to spend in New Bedford

Figure 11: Number of hours visitors planned to spend in New Bedford

Figure 12: Number of days actually spent in New Bedford

Figure 13: Number of hours actually spent in New Bedford

**Visitors'
awareness of
park's
existence/
significance**

Visitor groups to New Bedford Whaling NHP were asked if they were aware that the park existed prior to their visit. Figure 14 illustrates that 57% of the respondents were aware that the park existed prior to their visit. Thirty-nine percent were not aware of the park's existence and 4% were "not sure."

Eighty-seven percent of the visitors said that they were aware of the national significance of New Bedford Whaling NHP (see Figure 15). Table 6 shows what visitors consider as the most important information they learned on this visit.

Sources of information

Visitors were asked to list the sources of information they used to plan their visit to New Bedford NHP prior to coming. The most common sources of information were friends or relatives (28%), previous visits (20%), and travel guide/tour book (17%), as shown in Figure 16.

Twenty-three percent of visitors did not obtain any information prior to their visit to the park. Of visitor groups who used the Internet, 2% used the City of New Bedford web page, 1% used the National Park Service web page and 1% used other web pages. "Other" sources of information included visitors that live in or had previously lived in New Bedford, and word of mouth.

Figure 16: Sources of information

Visitors were asked how their visit to New Bedford fit into their travel plans. Forty-two percent of visitors reported New Bedford Whaling NHP as “one of several destinations” (see Figure 17). Another 41% of visitors said the park was their primary destination. Seventeen percent of visitors to New Bedford Whaling NHP said it was “not a planned destination.”

Travel plans

Visitors were asked where they spent the night prior to their arrival in New Bedford. Figure 18 shows that 44% of visitors spent the night at their place of residence and 23% spent the night in a hotel or motel. “Other” accommodations included staying on a boat or in a summer home. In addition, visitors were also asked the location of their accommodations the night prior to their arrival to the park. Table 7 lists the towns where visitors stayed by the type of accommodation.

Difficulty locating park

Visitors were asked if they had trouble finding their way to New Bedford Whaling NHP. Figure 19 shows that 6% of the visitors had difficulty finding their way to the park; 94% did not have trouble finding the park. Table 8 shows that lack of signs were the reason that visitors had difficulty locating the park.

Figure 19: Difficulty finding way to park

Table 8: Reasons visitors had difficulty locating the park

N=15 comments

CAUTION!

Comment	Number of times mentioned
Lack of signs	9
Lack of signs in city	3
Lack of signs on interstate	3

Visitors were asked what form of transportation they used to arrive in New Bedford on this trip. The most used form of transportation was a private vehicle (77%), as shown in Figure 20. The least used forms of transportation were bicycles and private boats (both <1%). “Other” methods of transportation used included motorcycle, van, and walking.

Forms of transportation used

Figure 20: Methods of transportation used to arrive at New Bedford

Reasons for visiting

Visitors were asked to list their reasons for visiting the New Bedford area on this trip. As shown in Figure 21, the most often listed reasons were to visit the New Bedford Whaling Museum (58%), learn about whaling and maritime history (29%), and visit New Bedford Whaling National Historic Park (25%). “Other” reasons that visitors came included visiting friends and relatives, waiting to take the ferry, and picking up travel brochures.

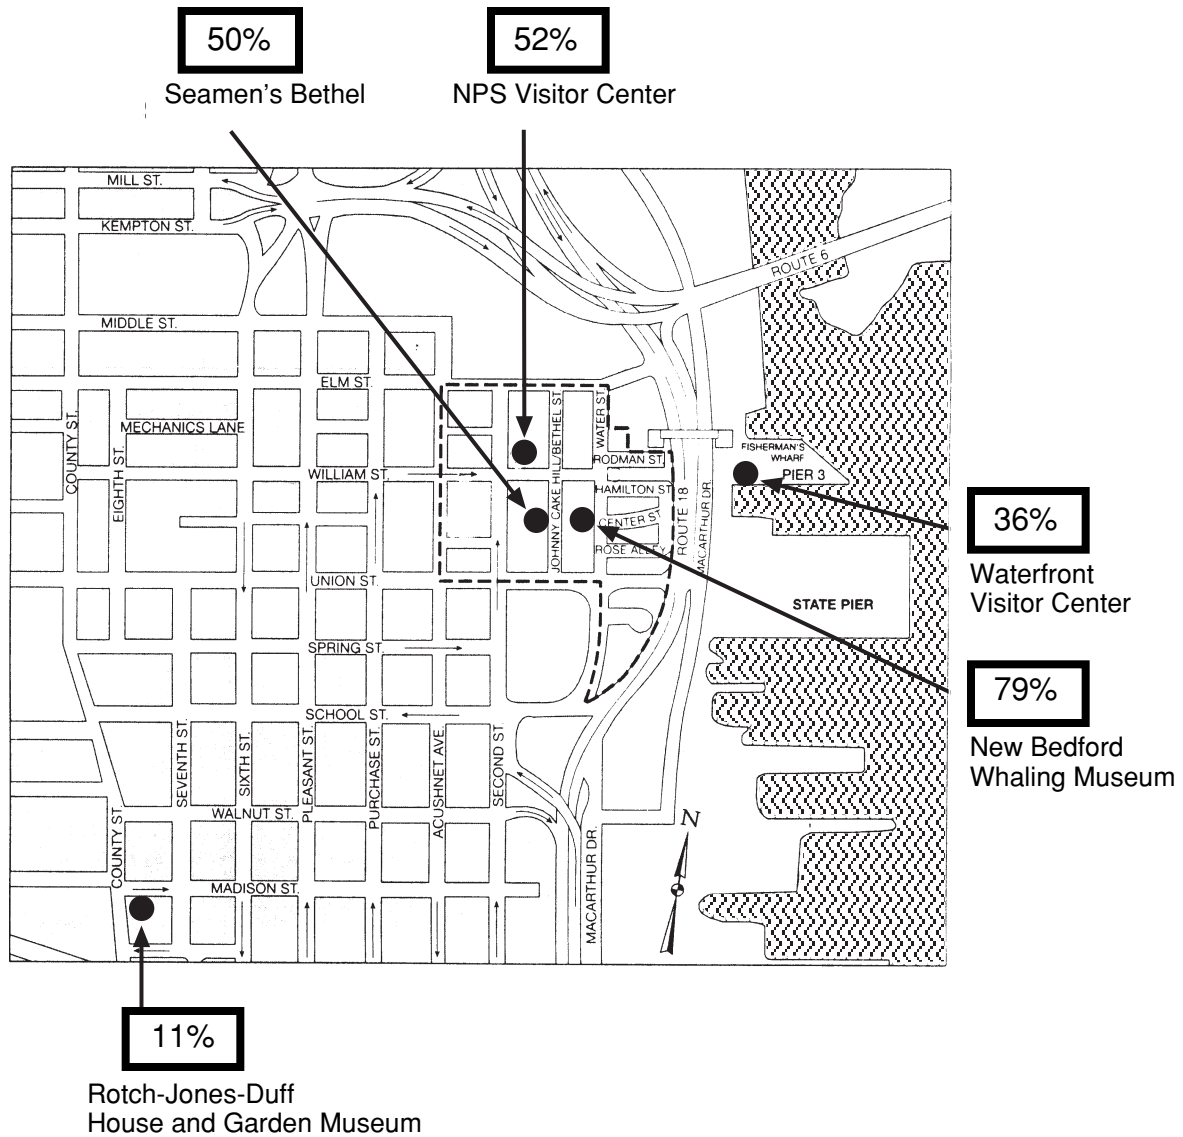

Figure 21: Reasons for visiting New Bedford area

Visitors were asked to list the sites they visited and the order in which they visited them. Map 2 shows the proportion of visitor groups that visited each site within New Bedford Whaling NHP during this visit. The most frequently visited sites include the New Bedford Whaling Museum (79%), NPS Visitor Center (52%), Seamen's Bethel (50%), Waterfront Visitor Center (36%), and the Rotch-Jones-Duff House (11%).

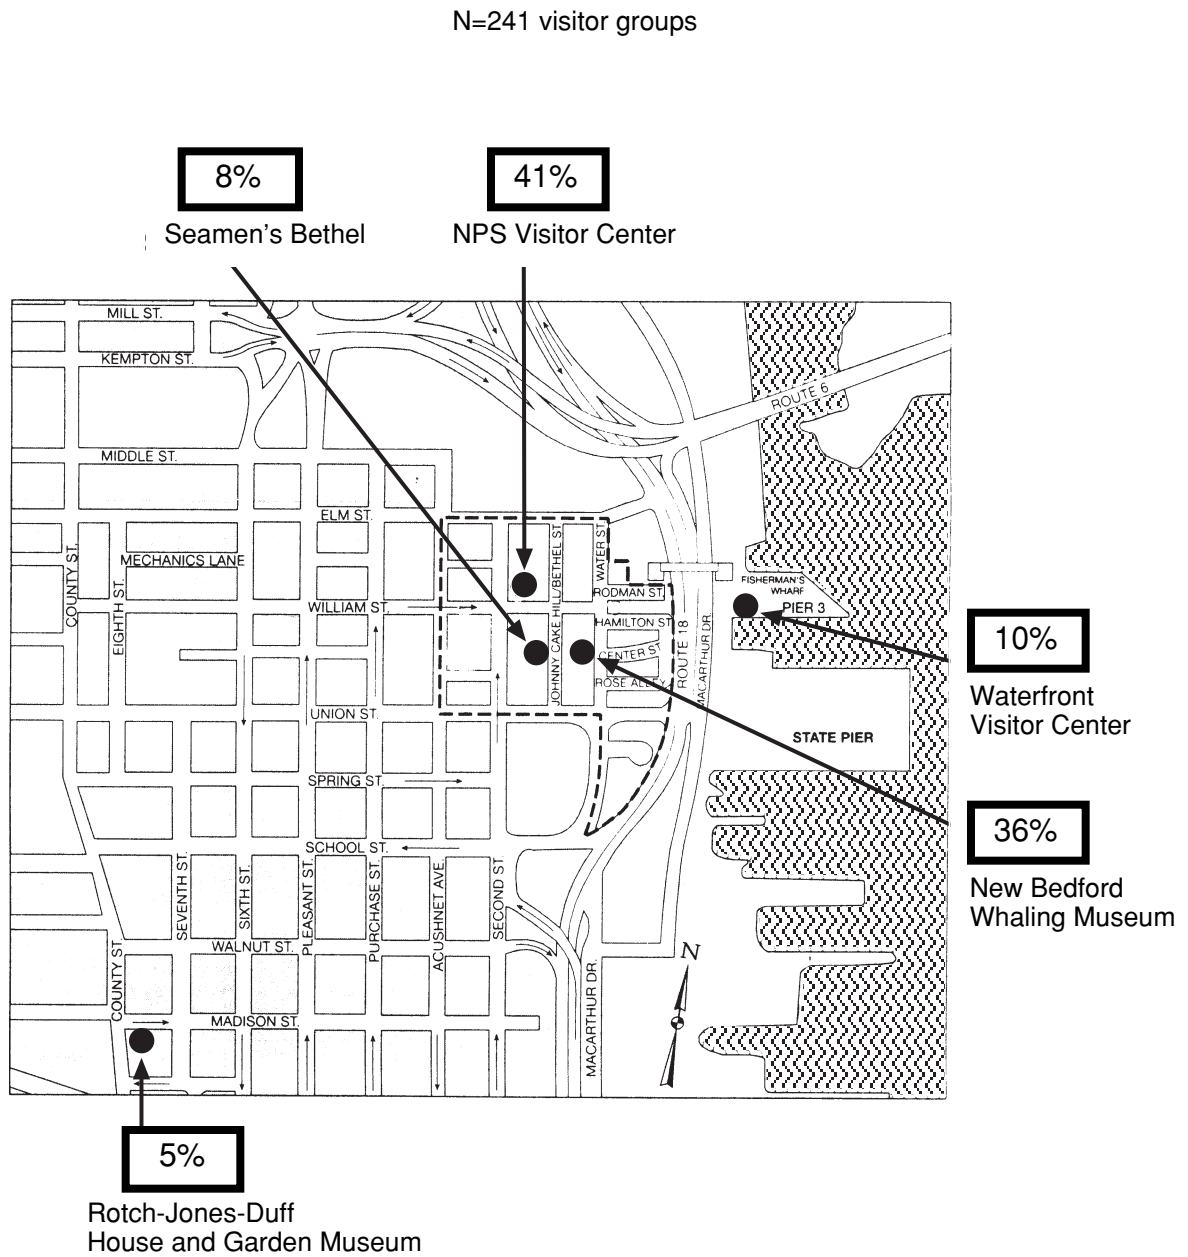

Sites visited

Map 3 shows the proportion of visitor groups who visited each site first during their visit. The sites most likely to be visited first include the NPS Visitor Center (41%) and the New Bedford Whaling Museum (36%).

N=266 visitor groups;
percentages do not equal 100 because visitor groups could visit more than one site.

Map 2: Sites visited

Map 3: Sites visited first

Visiting the waterfront

Visitors were asked a series of questions relating to the waterfront at New Bedford Whaling NHP. As shown in Figure 22, 53% of the visitors visited the waterfront during this visit. Those who visited were asked how difficult it was to find the waterfront and 89% said it was either "somewhat easy" or "very easy" to find (see Figure 23). Visitors were also asked if any member of their group used the pedestrian overpass to access the waterfront. Figure 24 shows that 56% of visitors did not use the overpass. When asked about the difficulty of getting around the waterfront, 87% said it was either "somewhat easy" or "very easy" (see Figure 25).

Figure 22: Visits to New Bedford waterfront

Figure 23: Ease or difficulty in finding the waterfront

Figure 24: Use of pedestrian overpass to access waterfront

Figure 25: Ease or difficulty in getting around the waterfront

Visitor groups were asked to note the park's visitor services and facilities which they used during their visit to New Bedford Whaling NHP. As shown in Figure 26, the services and facilities most commonly used by visitor groups were the New Bedford Whaling Museum (76%), NPS Visitor Center (57%), assistance from NPS staff (31%), and Waterfront Visitor Center (25%). The least used services were the "Catch the Whale" shuttle (1%) and the Preservation Society Self-Guided Architecture Tour (<1%).

NPS visitor services and facilities: use, importance, and quality

Figure 26: NPS visitor services and facilities used

Visitor groups rated the importance and quality of each of the services and facilities they used. The following five point scales were used in the questionnaire:

IMPORTANCE
5=extremely important
4=very important
3=moderately important
2=somewhat important
1=not important

QUALITY
5=very good
4=good
3=average
2=poor
1=very poor

The average importance and quality ratings for each service and facility were determined based on ratings provided by visitors who used each service. Figure 27 shows the average importance and quality ratings for each of the visitor service and facilities. All services and facilities were rated as above "average" both in importance and quality. Note that the Rotch-Jones-Duff House, guided walking tour, self-guided dock walks, NPS Junior Ranger Program, Rotch-Jones-Duff self-guided tour, "Catch the Whale" shuttle, and Preservation Society Self-Guided Architecture Tour were not rated by enough visitor groups to provide reliable data.

Figures 28-38 show the importance ratings that visitor groups gave for each of the individual services and facilities. Those services receiving the highest combined proportion of "extremely important" and "very important" ratings included New Bedford Whaling Museum (86%), NPS brochure (78%), and assistance from NPS staff and volunteers (76%). The facility with the largest proportion of "not important" responses was the Waterfront Visitor Center (6%). No respondents rated the importance of the Preservation Society Self-Guided Architecture Tour.

Figures 39-49 show the quality ratings that visitor groups gave for each of the individual services and facilities. Those services receiving the highest combined proportion of "very good" and "good" ratings included assistance from NPS staff and volunteers (94%), NPS brochure (87%), New Bedford Whaling Museum and NPS Visitor Center (both 86%). The highest proportion of "very poor" ratings was for the Waterfront Visitor Center (2%). No respondents rated the quality of the Preservation Society Self-Guided Architecture Tour.

Figure 50 combines the "very good" and "good" quality ratings and compares those ratings for all of the services and facilities.

Figure 50: Combined proportions of “very good” and “good” quality ratings for NPS visitor services and facilities

**New Bedford
area visitor
services and
facilities: use,
importance, and
quality**

Visitor groups were asked to note the New Bedford area services and facilities they used during their visit to New Bedford Whaling NHP. As shown in Figure 51, the services and facilities most commonly used by visitor groups were restrooms (61%), street parking (55%), restaurants (48%), and garage and lot parking (31%). The least used services were buses (<1%) and campgrounds (0%).

Figure 51: New Bedford area services and facilities used

Visitor groups rated the importance and quality of each of the services and facilities they used. The following five point scales were used in the questionnaire:

IMPORTANCE 5=extremely important 4=very important 3=moderately important 2=somewhat important 1=not important	QUALITY 5=very good 4=good 3=average 2=poor 1=very poor
---	---

The average importance and quality ratings for each service were determined based on ratings provided by visitors who used each service. Figure 52 shows the average importance and quality ratings for each of the visitor services. All services were rated as above "average" both in importance and quality. Please note that motels/hotels, ferries, marina, airport, buses, and campgrounds were not rated by enough visitor groups to provide reliable data.

Figures 53-63 show the importance ratings that visitor groups gave for each of the individual services. Those services receiving the highest combined proportion of "extremely important" and "very important" ratings included restrooms (92%), street parking (86%), and garage and lot parking (85%). The service with the largest proportion of "not important" responses was street parking and restrooms (1%). No respondents rated the campgrounds' importance.

Figures 64-74 show the quality ratings that visitor groups gave for each of the individual services. Those services receiving the highest combined proportion of "very good" and "good" ratings included garage and lot parking (84%), street parking (81%), and benches (80%). The highest proportion of "very poor" ratings was for restaurants (3%). No respondents rated the campgrounds' quality.

Figure 75 combines the "very good" and "good" quality ratings and compares those ratings for all of the services.

Visitors were asked to indicate if there was anything they expected to see or do but were not able to while visiting New Bedford Whaling NHP. Twenty-three percent of visitors responded that there was something they were unable to see or do (see Figure 76). The most common topics mentioned were visiting Seamen's Bethel, shopping, visiting the waterfront, and visiting the schooner *Ernestina* (see Table 9). The most commonly mentioned reasons visitors did not get to see or do what they expected included lack of time, *Ernestina* was not at dock, and renovation of exhibits (see Table 10).

Visitors were asked to rate how safe they and their group felt on this visit to New Bedford Whaling National Historical Park. Seventy-three percent of visitor groups reported feeling very safe while only 2% felt very unsafe (see Figure 77). The most commonly given reasons for feeling unsafe included being in area after dark, the presence of vagrants, and being uncomfortable on the waterfront (see Table 11).

Safety

CAUTION!

Comment	Number of times mentioned
After dark	1
Vagrants in the area	1
Uncomfortable on waterfront	1

Expenditures

Visitors were asked to list their expenditures in the New Bedford area (within 1/2 hour drive of the park) during their trip. They were asked how much money they spent for lodging (motel, camping, etc.), travel (gas, rental car, bus fare, etc.), food (restaurant, groceries, etc.), fees (museums, tours, etc.) and "other" items (recreation, film, books, gifts, etc.).

Total expenditures: Almost one-half of the visitors (48%) spent up to \$50 in total expenditures during this trip (see Figure 78). The average visitor group expenditure during this visit was \$141. The median visitor group expenditure (50% of groups spent more; 50% spent less) was \$45.

Food accounted for the greatest proportion of total expenditures (35%), followed by lodging and "other" items (each 20%), as shown in Figure 79.

Lodging: Of visitors reporting total expenditures for lodging, 71% said they spent no money (see Figure 80).

Travel: For travel, 64% of visitor groups spent up to \$50 (see Figure 81).

Food: For food, 64% of the groups spent up to \$50 (see Figure 82).

Fees: Three-fourths of the visitor groups (75%) reported up to spending \$25 on fees (see Figure 83).

"Other" items: For "other" items 61% of the groups spent up to \$50 (see Figure 84).

Per capita expenditures: The average per capita expenditure was \$55.

Figure 84: Expenditures for "other" items in the New Bedford area

Visitor groups were asked if they were interested in learning about the history of whaling in New Bedford. Seventy-one percent of respondents said they were interested in learning about whaling in New Bedford (see Figure 85).

Visitor groups were also asked how they would prefer to learn about the history of whaling on a future visit to New Bedford Whaling NHP. As shown in Figure 86, the most commonly listed preferences for learning about whaling history include visitor center and museum exhibits (68%), audio-visual programs such as videos, movies, slide shows, etc. (66%), printed materials such as books, brochures, maps, etc. (62%), ranger or volunteer-led walks and tours (59%), and outdoor exhibits (54%). The learning method visitors were least interested in was children's programs (30%). Other preferences for learning about park resources include newsletters, web sites, and additional visitor centers.

Interest in learning whaling history; preferred methods

Figure 86: Methods of learning about natural and cultural resources

Visitor groups were asked to rate the overall quality of the visitor services provided at New Bedford Whaling NHP during this visit. Most visitor groups (91%) rated services as “very good” or “good” (see Figure 87). No visitor groups rated the overall quality of services provided at New Bedford Whaling NHP as “very poor.”

**Comment
summary**

Thirty-seven percent of visitor groups (105 groups) wrote additional comments, which are included in the separate appendix of this report. Their comments about New Bedford Whaling National Historical Park are summarized below (see Table 15). Some comments offer specific suggestions on how to improve the park; others describe what visitors enjoyed or did not enjoy about their visit.
